Adjourn to the next regular Planning Commission meeting on July 7, 2020 at 6:00 p.m. via teleconference.

PLANNING COMMISSION MEETING PROCEDURES

This Agenda is subject to amendment up to 72 hours prior to the date and time set for the meeting. Please refer to the Agenda posted at the Community Development Department, 955 Shasta Avenue, for any revisions, or call the Department at 805-772-6264 for further information.

Written testimony is encouraged so it can be distributed in the Agenda packet to the Commission. Material submitted by the public for Commission review prior to a scheduled hearing should be received by the Planning Division at the Community Development Department, 955 Shasta Avenue, no later than 5:00 P.M. the Tuesday (eight days) prior to the scheduled public hearing. Written testimony provided after the Agenda packet is published will be distributed to the Commission but there may not be enough time to fully consider the information. Mail should be directed to the Community Development Department, Planning Division.

This Agenda may be found on the Internet at: www.morrobayca.gov/planningcommission or you can subscribe to Notify Me for email notification when the Agenda is posted on the City's website. To subscribe, go to www.morrobayca.gov/notifyme and follow the instructions.

The Brown Act forbids the Commission from taking action or discussing any item not appearing on the agenda, including those items raised at Public Comment. In response to Public Comment, the Commission is limited to:

1. Responding to statements made or questions posed by members of the public; or
2. Requesting staff to report back on a matter at a subsequent meeting; or
3. Directing staff to place the item on a future agenda. (Government Code Section 54954.2(a))

Commission meetings are conducted under the authority of the Chair who may modify the procedures outlined below. The Chair will announce each item. Thereafter, the hearing will be conducted as follows:

1. The Planning Division staff will present the staff report and recommendation on the proposal being heard and respond to questions from Commissioners.
2. The Chair will open the public hearing by first asking the project applicant/agent to present any points necessary for the Commission, as well as the public, to fully understand the proposal.
3. The Chair will then ask other interested persons to present testimony either in support of or in opposition to the proposal.
4. Finally, the Chair may invite the applicant/agent to respond to the public testimony. Thereafter, the Chair will close the public testimony portion of the hearing and limit further discussion to the Commission and staff prior to the Commission taking action on a decision.

APPEALS

If you are dissatisfied with an approval or denial of a project, you have the right to appeal this decision to the City Council up to 10 calendar days after the date of action. Pursuant to Government Code §65009, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the Commission, at, or prior to, the public hearing. The appeal form is available at the Community Development Department and on the City's web site. If legitimate coastal resource issues related to our Local Coastal Program are raised in the appeal, there is no fee if the subject property is located within the Coastal Appeal Area. If the property is located outside the Coastal Appeal Area, the fee is a \$277 flat fee. If a fee is required, the appeal will not be considered complete if the fee is not paid. If the City decides in the appellant's favor then the fee will be refunded.

City Council decisions may also be appealed to the California Coastal Commission pursuant to the Coastal Act Section 30603 for those projects that are in their appeals jurisdiction. Exhaustion of appeals at the City is required prior to appealing the matter to the California Coastal Commission. The appeal to the City Council must be made to the City and the appeal to the California Coastal Commission must be made directly to the California Coastal Commission Office. These regulations provide the California Coastal Commission 10 working days following the expiration of the City appeal period to appeal the decision. This means that no construction permit shall be issued until both the City and Coastal Commission appeal period have expired without an appeal being filed. The Coastal Commission's Santa Cruz Office at (831) 427-4863 may be contacted for further information on appeal procedures.

In compliance with the Americans with Disabilities Act, if you need special assistance to participate in this meeting, please contact the Community Development Department at (805) 772-6264. Notification 24 hours prior to the meeting will enable the City to make reasonable arrangements to ensure accessibility to this meeting.

Staff Report

TO: Planning Commission **DATE:** June 9, 2020
FROM: Jen Callaway, Interim Director of Public Works/Finance Director
Damaris Hanson, Environmental Program Manager
SUBJECT: Annual Water Report 2019 and Recommendation for Allocation of Water Equivalency Units (WEU) for FY2020-21

RECOMMENDATION

Staff recommends the Planning Commission review the 2019 annual water report and allocation of the FY 2020/21 Water Equivalency Units and forward the following recommendations to City Council:

1. Allocate 50 Water Equivalency Units (WEUs) for residential development and 65 for commercial development for a total of 115 WEUs for FY2020/21

BACKGROUND

The Public Works Department, Pursuant to Morro Bay Municipal Code (MBMC) Section 13.20, has prepared the Annual Water Report highlighting any significant changes in water availability and reporting the water equivalency units (WEU) from the previous year. A WEU is defined as a unit of measure for water use equal to the average amount of water used by a single-family residence over the period of one year. Since 2016 this amount is 8,732 cubic feet of water or 90 GPCD. This amount was lowered from previous years due to the historical trend of lower water use compared to previous years. The intent of the WEU allocations are to regulate the addition of new water users to the City's water system and to ensure the demand for water shall not exceed available water supply.

In 1984 the citizens adopted Measure F (Codified as Ordinance 266 in MBMC as Chapter 13.20), a "Growth Management System". This measure set a maximum population of 12,200 by the year 2000. To accomplish the housing needs of this population growth, Measure F set a maximum number of housing units to a limit of 70 new units per year with a maximum variation in the number of units in a year cannot exceed 10 percent or 77 WEUs for residential units. City Council acted on August 27, 2007 to reduce the number of allocated housing units to 50 new housing units. Ordinance No. 266 requires allocation mix of 60-percent SRF and 40-percent MFR. Since housing and population growth has not increased as projected, i.e. the City has yet to reach Measure F population of 12,200, new housing units can still be issued. The population growth estimates in the proposed General Plan predict reaching the Measure F established population in 2040.

DISCUSSION

Projected Water Supply FY20/21

The City of Morro Bay's primary water source is surface water from the State Water Project (SWP). The SWP is administered locally by the San Luis Obispo County Flood Control and Water Conservation District. The water available from the SWP (allocation) is determined every year by the State Department of Water Resources and is based on rainfall and snowpack in the watersheds that serve as a source for the SWP. The SWP annual allocation to contractors for 2020 is 20-percent of the total contracted amount. For Morro Bay this results in a delivery of 721 acre feet of SWP water. This allocation in combination with the City's available drought buffer and storage in San Luis Reservoir along with the Countywide excess availability and local production; is enough to make up the difference between delivery requests and the City's estimated demand of 1,030 acre feet.

State Water is an interruptible source of water. If there is a line break/repair or an emergency, Morro Bay could be without water from this source. In 2019 the Chorro Valley pipeline, which serves Morro Bay along with CMC, Cuesta and the County Operations Center was unable to provide the requested amounts of water for several months, due to a faulty control valve, which has been repaired. Additionally, the SWP does "shut down" once a year for routine maintenance, typically in October and/or November and has typically been anywhere from 1-2 weeks to a month.

The City's other sources of water are constrained as well, by a variety of water quality, and permitting issues. To use the Chorro Valley wells requires stream flows in Chorro Creek must exceed 1.4 cubic feet per second (cfs) per the City's water rights license/permit; additionally, water pumped from these wells are high in nitrates and cannot be used without treatment or blending. The City would need to perform upgrades to the water system in order to treat this water from the Chorro Valley. The Morro Valley wells are also high in nitrates and are treated at the City's Water Treatment Plant, the Brackish Water Reverse Osmosis (BWRO) is used to remove nitrates. There are also upgrades needed at the BWRO plant if this plant was to be used on a continuous basis.

Local Conservation Requirements: June 2018 City Council revised the water conservation requirements to implement Mandatory Water Conservation Requirements. This is a step down from Severely Restricted Water Supply Conditions. The main difference between these two requirements being mandatory requirement do not restrict the day in which you can water outdoors. In June 2016, Morro Bay completed the "stress test" and reduced our mandatory water conservation requirements from 12% to 0%. Over 83% of the State had 0% conservation after the stress test was completed. Morro Bay has continued to reduce water use over the years when compared to the base year, 2013. From 2014 to the present the City's water conservation rate has continued to decrease. For additional information on the SWP in San Luis Obispo County visit the County's [website](#).

Water Management Planning

The OneWater plan was adopted by City Council in November of 2018. The OneWater Plan reviewed all the City's water resources (Potable Water, Wastewater and Stormwater) holistically to have a complete water resource picture. The OneWater plan did a complete study of the City's water portfolio and determined that due to the restrictions on the Chorro Valley water rights this is not a reliable water source for the City. Additionally, due to the costs associated with seawater desalinization, recommended discontinuation of this as a water supply. On November 27, 2018 City Council adopted Resolution 92-18 approving the OneWater Planning document which documented one of the Council's major goals:

“the OneWater planning effort (Plan) has continued as a City Goal since 2016 and the following was included in the 2018 Council's approved Goal and Objectives document:

Goal 2: Water Reclamation Facility (WRF) and OneWater Review and Implementation...The City is also working on a comprehensive plan looking at all the city's systems that address water, from sewer to potable water to stormwater. The OneWater Plan establishes a plan to secure our water future and establish a long-term capital improvement plan to improve water and sewer infrastructure;”

and provided the following direction regarding water supply:

“Staff is directed to use the recommendations for water supply options section of the Plan as guidance in the consideration, development and implementation regarding the composition of the City's future water supply portfolio.

Staff is directed to take the following actions regarding specific water supply options:

A. Begin the decommissioning of the City's seawater desalination facility, including but not limited to inactivation of the sea water wells, removal of the seawater pumps and removal of the sea water reverse osmosis pressure vessels, and

B. Begin the process to relinquish water rights in the Chorro Valley, including the discontinuation of stream flow monitoring.”

The new Water Reclamation Facility will provide the City with the ability to provide up to

800 acre-feet per year of water through (indirect) potable reuse (in accordance with Title 22 of California's Code of Regulations) by injecting this highly purified water into the Morro Valley groundwater basin and recovering that water with its existing extraction wells. This water source was determined to be a more reliable, sustainable and cost-effective water source than other options analyzed in the OneWater plan.

Potable Water Production Summary

As shown in Attachment 1, Water production from 1980-2019, no water was extracted from Chorro and Morro Basins for direct distribution into the water supply, 938 acre-feet were delivered from the State Water Project (SWP), and 101 acre-feet of treated Morro Basin well water from the BWRO treatment plant. Attachment 2 provides an historical record of water production and use from 1960 through 2019.

Summary of FY 2019-2020 activity:

The Council authorized 115 WEUs for FY 2019-2020. Thirty WEUs to be used for single-family dwellings and 20 for multiple-family dwellings with 65 allowed for commercial/Industrial uses. Those WEUs were allocated on a first-come, first-served basis. The tracking of the WEUs utilized for FY 2019-2020 indicates 37 of the 115 WEUs allocated were used as follows:

- 0.59 Commercial (Virg's Landing)
- 6 Single-Family
- 1.5 Multi-Family (three-unit apartment building, 0.5 WEU per unit)

This is not a comprehensive list of all building activity, but rather a list of those activities which required a WEU allocation.

Conclusion:

Staff recommends the Planning Commission forward a recommendation to Council to allocate 115 WEU for FY 2020-2021. Fifty WEUs, 30 for SFR and 20 for MFR. Also allocate 65 WEUs for Commercial/Industrial development for a total of 115 WEUs.
